

## **JACKAL BUZZARD at KIRSTENBOSCH – November 2021.**

"We had been doing the Bioblitz and got to Kirstenbosch mid to late afternoon. We watched the Buzzard circling the lawns, then he suddenly landed and picked up something but he was too far for myself or Linda to id it.

He took it to the roof of Moyo where he started tucking into it, and we still couldn't id it as it was behind the gutter. Only when I got home and put the pics on my pc, did I see it was an obvious Crab!"

Margaret Maciver took the photos of the Jackal Buzzard who seems to have moved into Kirstenbosch.

Report by Margaret Maciver.
